SSAAGALA'AGALAMIDDE

The Buganda Cultural and Development Foundation (BUCADEF) aims to promote and foster the culture, social and economic advancement of all people of Buganda. We do so by developing and implementing innovative and sustainable projects in health, education, culture, environment and other sectors.

BUCADEF works in central Uganda, in the Bantu kingdom of Buganda. It is the largest of all traditional kingdoms of the present East African region.

BUCADEF is a registered non-government organization that is also non-political and non-sectarian. It was established by the Kingdom of Buganda in 1994. Buganda is endowed with many untapped resources which support sustainable development opportunities for the betterment of its communities.

Our primary beneficiaries rural and urban poor communities, women, youth and disadvantaged peoples.

## WHAT BUCADEF DOES

### TRAINING

We run ongoing training programs on issues including income generation and food security.

**Districts:** Masaka, Mubende, Kiboga, Mukono, Mpigi and Rakai

### FOOD SECURITY

We work with growers to improve farming practices and increase the yield of their crops, thereby creating food security. The ultimate goal is to commercialize agriculture.

We provide farmers with high-yielding maize, beans, ground nuts seeds, mosaic disease-resistant cassava stems, and environmentally friendly fertilizers (UREA & DAP). Extension support is also available on a regular basis.

**Districts:** Mukono, Mubende, Mpigi, Luwero, Kiboga and Wakiso.

### WATER AND SANITATION

This project increases people's access to clean and safe water and improves general sanitation and hygiene in Buganda.

We work with the local communities to construct shallow wells and taps, and drying racks for clothes, dig latrines, protect natural water springs, and maintain a hygienically clean home environment.

**Districts:** Mityana, Mubende, Kasanda and Kiboga

## **NUTRITION AND EARLY CHILDHOOD**

We work with communities to improve the growth and development of children under 6 years of age in nutrition, health, psychosocial and cognitive aspects.

BUCADEF implements nutrition-related activities in selected areas on behalf of the Government of Uganda.

## **MICROFINANCE**

This project aims to increase rural people's access to micro-credit services, especially women. We provide beneficiaries with soft loans and training in simple business management.

## **SUSTAINABLE AGRICULTURE**

We support communities to farm and work their land sustainably, rather than exploit local forests for short-term gains.

Sustainable farming is the best means to attain food security and ongoing incomes, while ensuring long-term soil productivity.

## **MODEL HOME PROJECT**

We work with local communities to build well-structured and hygienic homesteads with planned farmland and connection to communal infrastructure.

This integrated home improvement project can significantly improve the domestic quality of life for the people of Buganda.

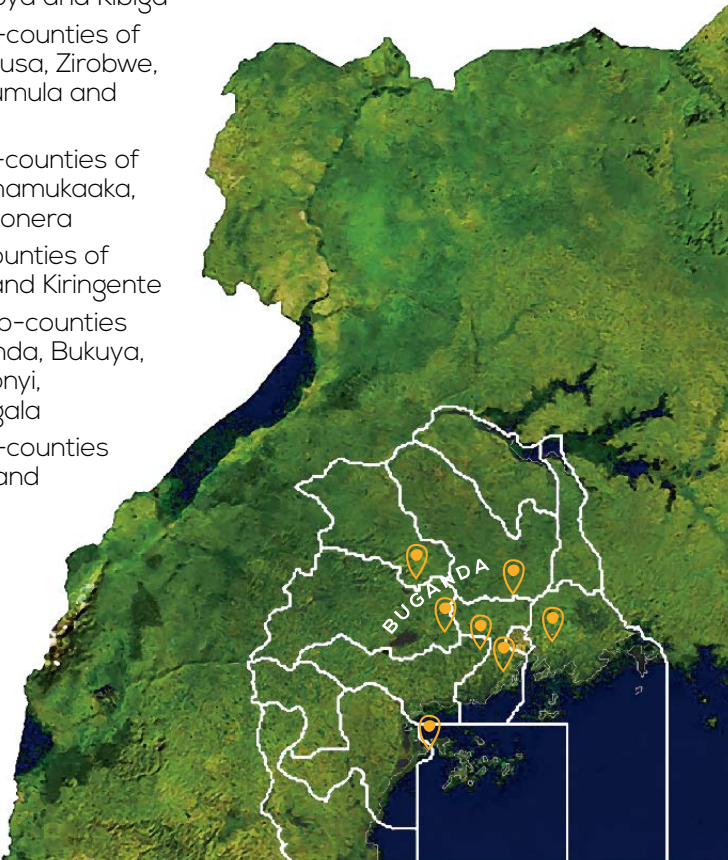

## WHERE BUCADEF WORKS

There are 18 counties in Buganda: Buddu, Bugerere, Bulemeezi, Buruli, Busiro, Busujju, Butambala, Buvuma, Buweekula, Ggomba, Kabula, Kkooki, Kyaddondo, Kyaggwe, Mawogola, Mawokota, Ssese, and Ssinga

We currently work across 8 of them:
